

Penelope Garden Rose

Full Sun – Partial Shade

4' – 6'

Shrub Rose

Pale Pink

April - November

Fragrant

Growth Habit: 'Penelope Rose' is an open shrub rose. It grows easily in nearly any soil and rarely has pest or disease problems.

Bloom: This rose blooms heavy in spring, rests in summer and repeats blooming in the fall. It has dark green foliage that is dense and spreads vigorously.

Notes: This rose was discovered in 1924. It's hardiness zones is 6 – 9, fertilize in Spring just before new growth begins and keep moist until completely established. Average water needed during growing season.

The Penelope Rose can be viewed in the Master Gardener's Demonstration Garden located behind Hood County Annex 1 on 1410 W. Pearl St, Granbury, Texas
